Finer Lilies Oregon-Grown Bulbs

READY TO PLANT IN YOUR GARDEN THIS FALL

RED CHAMPION LILY (The Improved Speciosum Rubrum)

Order bulbs now. They will be shipped with their full root systems intact, in late October and early November, which is the proper planting time. Select a spot for them in rich, porous soil that is sunny and well drained. Full cultural instructions will be sent with shipment.

Auratum Platyphyllum (Goldband Lily). Immense blooms, from 7 to 9 inches across, exotic and richly scented. As many as 15 are borne on a mature plant, standing fully 6 or 7 feet high. Needs rich, well-drained soil and prefers light shade. Late fall planting gives best results. \$1.25 each; 3 for \$3.25.

Enchantment. A most beautiful, vibrantly colored new hybrid with many large, cupped, upright flowers of an intense, blaring nasturtium-red. Long-lasting flowers. Late June and early July bloom. 75c each; 3 for \$2.00.

Estate. A magnificent Lily for midsummer. Extra-large, pure white flowers freely produced on 4-foot stems. Plant 6 to 8 inches deep in average soil. \$1.00 each; 3 for \$2.75.

Fireflame. A vivid, sparkling Indian-red. Wide-petaled flowers of great substance that face straight upward and glossy, healthy foliage combine to make this a most rewarding plant. Late June flowering. Grows 2 to 3 feet tall. \$1.50 each; 3 for \$4.00.

Formosanum. The latest flowering of all the popular Lilies, this white trumpet type is especially desirable for moderate climates. Often flowers as late as September. Our strain is tall and free flowering. Plant 5 to 6 inches deep in sun or partial shade; water during the summer. 85c each; 3 for \$2.25.

Golden Chalice Hybrids. A fine group of seedling Lilies we can heartily recommend. Warm golden colors predominate in this early June, cup-shaped group, 1 to 2 feet tall. Full sun. Plant several bulbs together. 75c each; 3 for \$2.00.

Golden Clarion. A fine de Graaff strain of trumpet types, ranging in color from clear yellow to gold. Very beautiful and richly colored. Yellow and gold trumpets are sensational whenever exhibited. \$2.00 each; 3 for \$5.00.

Green Mountain Hybrids. An impressive group of trumpet Lilies with very large flowers, combined with a green throat and brown petal exteriors. Distinct in shape and color from Olympic Hybrids, and valuable for exhibition and specimen planting as well as cutting. Same culture as Olympic Hybrids; plant in very light shade. \$1.35 each; 3 for \$3.75.

Henryi. Grows 5 to 8 feet tall. Blooms in late July and August, with 20 or more golden orange, recurved, pendent flowers. Plant 6 inches deep and 8 to 12 inches apart. 75c each; 3 for \$2.00.

Madonna. The oldest Lily known. Must be planted very shallow. Order now and plant just as early as possible. 75c each; 3 for \$2.00; 12 for \$7.00.

Olympic Hybrids. The finest, tallest and largest trumpet Lilies yet produced. Broader and stronger flowers than the Regal Lily, with pyramidal flower heads. Flowers vary from ivory-white through soft green, with deeper green and russet tints on the outside. These graceful, 5 to 7-foot plants flower in July and do well in full sun or light shade. 85c each; 3 for \$2.25.

Olympic Pink Perfection. Selected from tens of thousands of Olympic Lilies. A strain with accentuated coloring and large, widely expanded flowers. New, robust, giant trumpet Lilies in shades of fuchsia to rose-pink. They need filtered sunlight and cool weather to bring out their best color. They are apt to bleach in full sun. \$2.50 each; 3 for \$6.50.

Parade. Rich golden yellow, outward-facing flowers with burnished gold midrib in each petal. Blooms well spaced on 2-foot stems. June, July. \$1.00 each; 3 for \$2.75.

Rainbow Hybrids. A Candlestick Lily in gay, sparkling new colors. Vigorous and hardy. From 1 to 3 feet tall, they will grow anywhere. Colors range from pale straw-yellow to deepest maroon. June flowering. 60c each; 3 for \$1.50; 12 for \$5.50.

Red Champion. The lovely Speciosum Lily from Japan. Has won out in all competitive trials. Blooms in late August. \$1.25 each; 3 for \$3.50; 12 for \$12.50.

Regale. The most widely grown of all trumpet Lilies and has done a great deal to popularize the Lily family for garden use. Prolific, sturdy and hardy. 65c each; 3 for \$1.65; 12 for \$5.25.

Tenuifolium (pumilum). Thin, wiry stems, seldom more than 2 feet tall, bear numerous bright scarlet or lacquer-red flowers in June. Small and dainty. Prefers full sun and a well-drained location. Plant 4 inches deep. 50c each; 3 for \$1.25; 12 for \$4.50.

White Champion. A worthy companion for Red Champion. Purest white, vigorous and dependable. August, September. \$1.25 each; 3 for \$3.25.

OLYMPIC HYBRID LILIES

ROYAL GOLD LILY (The Golden Regale Lily)

This beautiful new variety is identical with the best *L. regale* except for its true golden coloring. The flowers have a most attractive, glistening surface. A NEW PRINCESS IS BORN!!!

The Word is *Exquisite!!!*

("EXQUISITE" is the word most frequently used when seen for the first time.)

GRAF-MELON

A Sensational *New* Daylily (Hemerocallis) for 1961

A Carroll Gardens Introduction

GRAF-MELON (Daylily)

It's New-It's Different-It's Beautiful!

A TRUE MELON COLOR

Easy to grow in sun or partial shade. Be among the first to have this new Princess blooming in your garden next summer.

GRAF-MELON

A glorious daylily, with a warm apricot-melon color deep in its throat, in the stamens and underlining its petals. The petals are a pale, buttery-soft peach color, with a faint over-glaze of the apricot-melon which gives it an ethereal quality and an iridescence that shades into mauve in certain lighting.

One's immediate impression is that of warm, soft beauty and the exquisite luminous flower is of gracious beauty, very feminine, very dignified, utterly lovely.

If one looks closely at the edge of the petals, one will notice their delicate lavender-pink which is also prominent in the mid-rib.

The flowers are large and wide-petaled, of most perfect form averaging 6 to 8 inches across. Scapes are three to four feet in height and are loaded with buds which give a succession of bloom from about the first of July to early August.

When seen for the first time, visitors invariably exclaim "Exquisite"!

THE CHRISTMAS ROSE
(Helleborus Niger)

White

Single white flowers occasionally tinted pink, on 10 to 12-inch stems. November to March. \$1.50 each; 3 for \$4.00; 6 for \$7.50.

THE LENTEN ROSE
(Helleborus Orientalis Atrorubens)

Red

New variety with crimson-purple flowers on 12 to 15-inch stems. February to April. \$1.50 each; 3 for \$4.00; 6 for \$7.50.

WHEN
TO PLANT

The best time to plant or transplant the Christmas Rose is from late September until December, in well-drained soil with mulch around the base of the plants. Christmas Roses are active in the cold weather and make new roots during this period, which is the reason that fall and early spring are recommended for planting.

Helleborus make excellent house plants. When planted in 6-inch or 8-inch pots, they can be easily forced to bloom indoors during the winter months.

THE CHRISTMAS ROSE AND THE LENTEN ROSE are ideal gifts for your gardening friends throughout the year, particularly at Christmas.

Oriental Poppies

to Plant from Late August to November

Oriental Poppies, with their brilliant gigantic blooms, are among the very finest perennials for the garden, particularly now that soft pastel tints are available, ranging from the softest of pink to deep red and white. They are easily grown and once established will live for many years. The best time to plant them is September and October. Poppies should be planted deeper than the general run of perennials. Set the crowns approximately 2 inches below the level of the ground. Mulch the first winter after planting, using excelsior, pine branches, or other material of similar nature. This mulch should not be applied until the ground is frozen, possibly November or December, depending on the locality. The plants offered here are strong, field-grown specimens and should bloom satisfactorily next year. *Order now.*

PEONIES

to Plant this Fall

Peonies are long-lived plants that do not require transplanting unless they show signs of deterioration. For that reason it is worthwhile to be particular about the place where they are to be planted. Choose a sunny location that gets good drainage. Dig deep, and use some well-rotted cow manure or a commercial fertilizer to enrich the soil. Bone-meal is also recommended.

Fall is the best time to plant Peonies. Plant so that the eyes are 1½ to 2 inches below the soil surface.

The varieties offered here are the very finest in their class; only the highest rated are offered. The plants offered are strong, 3 to 5-eye, healthy plants and should give excellent results. Most of them will bloom next spring.

SINGLE PEONIES

The Single Peonies are excellent in the garden. Their lighter flowers and stiff but graceful stems make them stand up better than Double Peonies. With their brilliant colors they are unsurpassed for the perennial border and in front of and among shrubbery. They are of easy culture and bloom about the same time as Double Peonies. Their average height is 2 to 3 feet.

Snow Wheel. An outstanding variety. Large, well-formed flowers on stiff stems. Free-blooming, compact plant growth. The best single white for show in the garden and for cutting. The large, distinctive yellow center adds to its beauty. \$2.50 each.

SPECIAL You may pick any 3 of the above varieties for \$5.00; or any 6 for \$9.00

TREE PEONIES

This famous group is the shrub type. The stems do not die to the ground each year as the herbaceous Peonies do, and in the course of many years they will reach the height of 3 to 4 feet. Most varieties bloom in early spring—late April to the end of May, depending on the locality. They are of easy culture and grow anywhere other Peonies do. It is best, however, to plant them where they are sheltered from sweeping wind.
